PROJECTS

Project Name – iEducate Online Learning Platform

Abstract:

E-learning fulfills the thirst of knowledge and offers online content that can be delivered for the learner at anywhere, anytime and any age through a wide range of e-learning solutions while compared with traditional learning systems. It also provides rapid access to specific knowledge and information. With the rapid growth of voluminous information sources and the time constraint the learning methodology has changed. Learners obtain knowledge through e-Learning systems rather than manually teaching and learning. This system is designed using HTML and CSS. This system supports the cross browser and is fully integrated with different databases.
